## Two Car Port Design Ideas

This is a model from CDNBuildings with the following specs:

2 1/2 x 2 1/2 - 12 ga steel frame 20'L x 20'W x9'H A-Frame with a 4/12 pitch roof Vertical Steel roofing Note: no other enclosures, doors, walls, etc. Also notice the "cathetral" truss design which would allow for more ceiling clearance. Also, prefer

truss design which would allow for more ceiling clearance. Also, prefer a monolithic concrete slab as a foundation.
